Abstract (en)
[origin: WO2020173744A1] The invention relates to a support device for plants, comprising a securing means (1) and a support means (2) arranged inside the securing means (1), said support means (2) comprising at least two support elements (5). Each support element (5) is connected to the securing means (1) via a resilient connecting means (3), and the securing means (1), the support means (2) and the connecting means (3) are formed as one single piece.
