Abstract (en)  
[origin: WO2021167521A1] The invention relates to a replacement panel (5), such as a floor panel, wall panel or ceiling panel and a connection element (71). The replacement panel (5) is adapted for locking, such as horizontal and preferably vertical locking, to one or more panels (1, 2, 3, 4), preferably by means of a folding displacement (F) of the replacement panel (5). The replacement panel (5) comprising at a first edge (51), a downwards open first locking groove (510) configured to receive a first locking element (73) of the connection element (71) by means of a vertical displacement of the first edge (51) for horizontal locking of the replacement panel (5) and an edge of an adjacent panel (1) by way of the locking elements (72, 73) of the flat, elongated connection element (71). The replacement panel (5) also comprises a sideways open displacement groove (511) provided with a therein displaceable locking tongue (512) configured to cooperate with a tongue groove (141) of an edge of an adjacent panel (1), for vertical locking of the replacement (5) panel and the adjacent first panel (1). The invention also relates to a kit, comprising the replacement panel and the connecting element, and a method for installing the replacement panel.
