Abstract (en)

[origin: WO2021165384A1] The invention relates to a holding device (4) for munition bodies (100), having two holding shells (4.2, 4.3) which are movable relative to one another and which form a holding region (4.10) in which a munition body (100) can be held, wherein the holding shells (4.2, 4.3) are rotatable (D) about a common axis of rotation, wherein the axis of rotation (D) of the holding shells (4.2, 4.3) runs through the holding region (4.10). Moreover, the invention relates to a magazine having a holding device (4), to a projectile lift (7) having a holding device (4), and to a method for holding munition bodies (100).
