Abstract (en)
[origin: WO2022188989A1] The invention relates to a deterrent and electrical pulse-applying glove device (1), comprising a palm side (2) and a back-of-the-hand side (3) with an external face (4) and an internal face (5) respectively external and internal to the glove device (1), the outer face (4) of the palm side (3) having installed on it at least two application contacts (11, 12) designed to be connected, by way of electrical connection means (17) comprising at least one contactor (19), to an electric power source (13). More specifically, two application contacts (11, 12) are installed on the outer face (4) on the palm side (3) at a distance (D) from one another so as to generate an electric arc between said contacts (11, 12) when they are connected to the electric power source (13) through the contactor (19) designed to be actuated from the internal side (20) internal to the glove device (1).
