Abstract (en)

[origin: WO2021165867A1] The invention relates to a fuse comprising electrically non-conductive inserts (6) and two end caps (2) of the core (1) made of an electrical conductor, wherein the end caps (2) of the core (1) are basically cylindrical in shape with a single base which includes an opening in the axis of the housing (3), and the end caps (2) of the core (1) include an arm (2a), wherein the core (1) is located between the bases of the inner end caps (4) inside the housing (3), wherein the end caps (2) of the core (1) are put on the both ends of the core (1), wherein the fuse element is connected to the end caps (2) of the core (1), and each of the end caps (2) of the core (1) is affixed through an arm (2a) to the corresponding inner end cap (4), and an insert (6) is provided between each inner end cap (4) and the outer end cap (5).
