Abstract (en)
[origin: EP4108593A1] The present invention relates to a keg cap for a keg, such as a beer keg, the keg comprising a keg head for filling the keg, wherein the keg cap comprises a lid and a skirt adjoining thereto, the keg cap comprising a detachable portion for removing the keg cap from the keg head, said detachable portion being outlined by a first and a second pair of tear lines, wherein the first pair of tear lines extends over the full diameter of the lid of the keg cap and wherein the inner wall of said skirt is provided with a plurality of internally directed resilient retention spears along the circumference of the skirt, wherein the angle of the retention spear with the inner wall of the skirt is between 15 degrees and 40 degrees. The present invention also relates to a keg provided with a keg cap, a mold, and a beer in a keg.
