Abstract (en)
[origin: US2022402675A1] Fluid container with: a first storage level configured to store the fluid, a second pressurization level configured to receive a gas in order to keep the first level under pressure, wherein the first and second levels can be stored flat when empty of fluid and gas, the container further comprising, an envelope configured to maintain said first and second levels in a maximum volume, said envelope being configured to be stored flat, at least one of said first and second levels comprises a pouch, said pouch being folded upon itself in a meridian plane connecting two edge folds of said envelope when in a flat configuration.
