Abstract (en)  
The present invention relates to a reinforcement material for use in the field of leather goods and footwear. In particular, the invention relates to a reinforcement material for leather goods or footwear, consisting of a support layer made of cotton impregnated with a water-based biodegradable polymer of an aliphatic polyurethane nature, wherein the surface of the reinforcement material is sanded. The non-biodegradable alternatives include soft polyacrylic resins ( $T_g < 0$ ), natural latex or SBR - soft styrene butadiene rubber. Leather goods or footwear obtainable with said reinforcement material are also described, as well as a method for the manufacture thereof.
