Abstract (en)
[origin: EP4108864A1] The present invention refers to a vehicle door handle assembly (1) comprising:- a bowl (5) configured to be mounted in an opening (7) of a door panel (3),- a peripheral gasket (9) disposed between the bowl (5) and the door panel (3) and configured to be sandwiched between the bowl (5) and the door panel (3) to provide waterproofness,- a strip (11) configured to be fastened to an upper part of the bowl (5),wherein the strip (11) comprises a hook (110) configured to be slid in a complementary slot (50) of the bowl (5) to ensure the vertical positioning of the strip (11) with respect to the bowl (5) when the door handle (1) is assembled to the vehicle and wherein the slot (50) and the peripheral gasket (9) are configured such that the peripheral gasket (9) is compressed locally by the hook (110) when the hook (110) is slid in the slot (50) in order to prevent movement between the strip (11) and the bowl (5)..
