Abstract (en)

[origin: WO2021170948A1] Heat treatment system (1) for a vehicle, comprising: - a main arm (3) comprising a main heat exchanger (34) and extending between a main convergence point (31) and a main divergence point (32); - a first arm (4) and a second arm (5) extending between the main divergence point (32) and the main convergence point (31), the first arm (4) comprising a first heat exchanger (41) and a device (42) for storing cooling fluid (FR), the second arm (5) comprising a second heat exchanger (51), - a secondary arm (7) comprising a secondary heat exchanger (73) and extending between a first divergence point (71) arranged between the compression device (33) and the main heat exchanger (34), and a first convergence point (72) arranged between the main heat exchanger (34) and the main convergence point (31).
