Abstract (en)

[origin: WO2021170867A1] The invention relates to a method for treating the surface of a moulded part produced with a plastic having ester, ketone and/or ether bonds, wherein the plastic is selected from the group comprising a polymer, copolymer, polymer blend and combinations thereof, wherein the method comprises a pre-treatment step (VS) for cationically modifying the surface of the moulded part. The cationic modification is carried out with a reactant dissolved in a solvent and having one or more amine, imine and/or amide groups.
