Abstract (en)

[origin: WO2021170400A1] The invention relates to a light module (1) of a motor vehicle lighting device, comprising: a light source (2, 2') intended to perform at least one photometric function, an electrochromic device (9) comprising at least one portion (91, 92) arranged downstream of the light source (2, 2') and capable of optionally having a diffusing appearance or a transparent appearance, and a controller (8) arranged to receive an emission instruction from the photometric function and to control, in accordance with the instruction, the emission of light by the light source (2, 2') and the appearance of the electrochromic device (9).
