Abstract (en)

[origin: CN115530557A] The invention relates to a drawer frame for fastening to two pull-out guides arranged on both sides, comprising a front frame part, a rear frame part and two side frame parts which define a frame longitudinal center axis, the front adapter can be respectively fixed on the front frame part in different transverse positions, and the transverse positions have different distances from the longitudinal central axis of the frame; and two rear adapters which can be fixed on the rear frame part in each case in different transverse positions with different distances from the longitudinal axis of the frame, a pair of front and rear adapters on one frame side having a fixing interface for fixing on a pull-out guide, and a pair of front and rear adapters on the other frame side having a fixing interface for fixing on a pull-out guide on the other frame side, and a pair of rear adapters on the other frame side having a fixing interface for fixing on the pull-out guide on the other frame side. And a pair of front adapter and rear adapter on the other frame side are respectively provided with a fixing interface for fixing on the other pull-out guide.
