Abstract (en)

[origin: WO2021175899A1] Present invention relates to an aerosol-generating article (100) for an aerosol-generating vaping device (200), wherein the aerosol-generating article (100) comprises an aerosol-generating substrate (3) and a heating element (5), wherein the aerosol-generating substrate (3) is a foam or a mousse arranged on a support (8) and wherein the heating element (5) is also arranged on the support (8) and configured to heat the aerosol-generating substrate (3) to generate an aerosol upon stimulation by an energy source.
