Abstract (en)  
[origin: WO2021175351A1] The invention relates to a thermoplastic-extrusion and/or two-component polymer additive, comprising binder-free tetrapodal zinc oxide, at least 90 weight percent of the additive consisting of tetrapodal zinc oxide or bonded tetrapodal zinc oxide pieces, the additive being in briquette form and having a density of between 0.3 and 1.5 grams per cubic centimeter. The invention further relates to a thermoplastic-extrusion and/or two-component polymer additive production method and to a use as additive.
