Abstract (en)

[origin: WO2021175708A1] The invention relates to a protection device (41) for protecting installation personnel while said installation personnel carry out installation works on a passenger transportation system (1) designed as an escalator or moving walkway. The passenger transportation system (1) comprises at least one clamping device (21) for a balustrade panel (31, 32, 33, 35, 36). A base region (47) of the protection device (41) is designed such that, instead of a balustrade panel, said base region can be held in the clamping device (21) such it can be clamped in place.
