Abstract (en)
[origin: WO2021175700A1] The invention relates to a water delivery module for injecting water into or upstream of the combustion chamber of an internal combustion engine, with a delivery unit having a pump for delivering the water from a tank, wherein the water can be delivered by means of the pump along a metering line to an injection point, wherein the delivery unit has a water outlet through which water can be expelled from the delivery unit, wherein the water outlet consists of a connector (2) onto which the metering line can be plugged, wherein water from the delivery unit can be conveyed along the connector (2) into the metering line, wherein the connector (2) has a portion that can be traversed by the water and that is part of the fluid line from the delivery unit to the metering line.
