Abstract (en)

[origin: WO2021175915A1] The present invention relates to a method for displaying a key parameter of a food treatment machine, more particularly a food processing machine or a food packaging machine, by means of display equipment on the food treatment machine, wherein a time history of the key parameter from a first time in the past to a current time is displayed in a first display area of the display equipment, wherein an incident position is determined in the first display area for at least one incident, occurring between the first time and the current time, and an incident symbol is displayed at the incident position determined in the first display area. The invention further relates to display equipment for a food treatment machine, more particularly a food processing machine or a food packaging machine, which equipment is designed to display a time history of a key parameter from a first time in the past to a current time in a first display area of the display equipment, wherein the display equipment is further designed to determine an incident position in the first display area for at least one incident, occurring between the first time and the current time, and to display an incident symbol at the incident position determined in the first display area.
