Abstract (en)

[origin: EP4115750A1] This filter comprises: a first filter body that has a first end face disposed on the side of a mouthpiece and a second end face disposed on the side opposite to the mouthpiece side; and a second filter body that is disposed at the second-end-face side of the first filter body and has a third end face that faces the second end face. The first and second filter bodies are respectively formed of either a sheet of paper or a sheet of nonwoven cloth. The void quantity as seen in the first end face of the first filter body is less than that as seen in the third end face of the second filter body.
