Abstract (en)

[origin: EP4115751A1] Provided is a filter including: a first filter main body having a first end face on a mouthpiece side and a second end face opposite to the mouthpiece side, the first filter main body being formed of a paper sheet or a non-woven fabric sheet; a second filter main body provided on the second end face side of the first filter main body, the second filter main body having a third end face facing the second end face, the second filter main body being formed of a paper sheet or a non-woven fabric sheet; and a channel for communicating air between the second end face and the first end face. The airflow resistance of the channel is lower than that of the first filter main body.
