Abstract (en)

[origin: WO2021180607A1] The invention relates to a stimulation insert (1), in particular for a orthesis or a sleeve, comprising a plurality of stimulation fields (2a, 2b, 3a, 3b, 4) which are each situated in at least two rows (2, 3) such that a chamber (7), which is free from stimulation fields (2a, 2b, 3a, 3b, 4) and is intended for receiving a joint or for application along a limb, is provided between two adjacent rows (2, 3), wherein a supply field (20) is provided in the region of the first ends (8) or the second ends (9) of the rows (2, 3), which supply field is connected to at least one supply element (5) for supplying a stimulation medium that comes from a stimulation medium source, wherein the stimulation fields (2a, 2b, 3a, 3b, 4) are interconnected such that the stimulation medium passes through said stimulation fields, starting from the supply element (5) at one end (8, 9) to the corresponding other end (9, 8) of the rows (2, 3).
