Abstract (en)

[origin: WO2020185076A1] A method for cleaning objects stacked in the manner of a stack, for example trays (T), more particularly trays for eggs or food products as fruit or vegetables, comprising, • - placing the objects stacked into each other on a support element • - setting the stack briefly in motion, whereby the objects stacked into each other briefly come loose from each other; and • - passing this stack through a cleaning liquid (10). In addition, an apparatus comprising a cleaning unit (8) wherein the cleaning unit furthermore comprises a drop tower (1) for guiding trays (T) substantially vertically from a supply conveyor (2) to, and dropping the trays (T) in, a basin (9) placed thereunder which comprises cleaning liquid (10).
