Abstract (en)

[origin: WO2021181039A1] The invention relates to a method for changing the working roll (12) in a rolling mill, which limits the risk of scratching the working roll (12), or even the risk of scratching the metal strip, during the removal or insertion of the working roll (12), by means of mechanical separating means, in particular arms (20, 21) of a fork system, inserted by robotic means.
