Abstract (en)  
[origin: WO2021180735A1] The invention relates to a method for generating and delivering charging current for an electric vehicle in a charging column, comprising the method steps of registering a first initial process, evaluating the first initial process, and starting the charging process in accordance with the result of the evaluation, the first initial process being different from a start command from a user for starting a charging process. The invention also relates to a charging column for carrying out the method.
