Abstract (en)

The invention relates to an electrode device 1 including at least one electrically conductive electrode 3 fixed to an electrically insulating carrier 2, the electrode 3 extended along a midline 4 and having a first end 5 and a second end 7, the second end 7 including a first tab 8 for mounting an electrical connector 15. The first end 5 includes a latch 6 inserted into a corresponding groove 11 in the carrier 2 and the second end 7 includes a register hole 10 registered with a corresponding register pin 13 formed on a flexible second tab 12 formed at the carrier 2. The invention also relates to a method for making such electrode device 1, and to a household appliance 16 including such electrode device 1. The household appliance may be a laundry dryer 16.
