Abstract (en)  
An air conditioning system (1) includes a plurality of air conditioners (2a, 2b, 2c, 2d) installed on a wall or a ceiling, and an air conditioning assisting device (4) installed at a position at an equal distance from each of the air conditioners (2a, 2b, 2c, 2d) on the wall or the ceiling. The air conditioning assisting device (4) includes a thermal image sensor (41), an assisting side communication unit (42) that receives information relating to operating states of some or all of the air conditioners (2a, 2b, 2c, 2d) from some or all of the air conditioners (2a, 2b, 2c, 2d), and transmits commands for air conditioning to some or all of the air conditioners (2a, 2b, 2c, 2d), a storage unit (43) that stores information obtained by the thermal image sensor (41) and information received by the assisting side communication unit (42), and a processing unit (44) that analyzes the information obtained by the thermal image sensor (41) and the information received by the assisting side communication unit (42), and generates the commands.
