Abstract (en)

[origin: WO2021185409A1] The present invention relates to a variable-pressure support (1), a patient bed (50) having such a variable-pressure support (1) and a method for operating such a variable-pressure support (1). A plurality of supporting elements (2) is provided. Moreover, according to the invention, a guiding arrangement is provided which has two guides (3a, 3b) which are arranged opposite one another in a transverse direction (Q) and extend in a longitudinal direction (L). The supporting elements (2) are movably mounted at opposite ends (2a, 2b) in the guides (3a, 3b).
