Abstract (en)

[origin: WO2021185647A1] The invention relates to a device (1) for manufacturing a container by means of blow moulding or stretch blow moulding from a plastic blank, the device comprising: • - a mould (2) comprising two half-moulds (21, 22) together defining an imprint (E) of the container to be formed; • - a support (31, 32) for each of the half-moulds (21, 22), each half-mould (21, 22) having a clearance relative to its support (31, 32); • - means for compensating a blow moulding pressure inside the mould (2).
