Abstract (en)
[origin: WO2022200198A1] The invention relates to a building service element for fastening in front of an outer wall of a building. The building service element is particularly suitable for use in the context of an energy-related building renovation and, in this context, for fastening in front of the outer wall of an existing building. The building service element has a modular and flexible design and enables different types of supply systems per flat.
