Abstract (en)

[origin: WO2021250622A1] A device (1) for producing a swimming pool comprising panels (2) each comprising a peripheral frame (5) forming upper (5a) and lower (5b) edges and vertical edge faces (5c) sealably assembled by coupling profiles (3) in order to form a closed volume of any geometric shape corresponding to said pool, the peripheral frame (5) of each panel (2) internally comprises at least one vertical (6) or horizontal (7) profile for defining at least two zones (8) inside the frame. According to the invention, each zone (8) is devoid of a cellular reinforcement structure.
