Abstract (en)
[origin: WO2021198765A1] A suit for motorcyclists (102) comprising an elastic or elasticized U-shaped band is described. The band (103) comprises a bottom section (106) arranged in a lumbar area of the suit along a respective longitudinal extension and a first wing (104) and a second wing (105). Each wing (104, 105) extends along a respective longitudinal direction from the chest along a respective flank as far as one end of the bottom section (106). Moreover, one or each wing (104, 105) of the "U" band (103) and/or the bottom section (106) has a yielding orientation or direction which is variable along the respective longitudinal extension. A process for making a suit elastic is also described.
