Abstract (en)  
[origin: CA3176724A1] The present invention relates to a platelet lysate foam obtained from a blood derivative (allogenic or autologous) which conserves the biological properties of the platelet lysates and has optimum properties, in particular mechanical properties but also conservation properties, which allow its marketing and facilitate its handling. The present invention also relates to the use of a platelet lysate foam for therapeutic purposes, cell culture and cell therapy. The present invention also relates to a method for obtaining a platelet lysate foam by a method of drying in a supercritical CO2 atmosphere.
