Abstract (en)

[origin: CA3173523A1] A carrier element for micro-needles for forming a micro-needle array has a plate-like base element (10). Mounting elements (14) for respectively connecting to a micro-needle (32) of the micro-needle array are provided on a front side (12) of the base element (10). Connecting elements (16, 36) are also provided, in particular on the front side (18) of the mounting elements (14). The connecting elements (16, 36) are formed in such a way that they have an undercut in the longitudinal direction (22) such that the needles (32) are reliably connected to the mounting elements (14).
