Abstract (en)

[origin: WO2021195201A1] A saw slide device (2500) allows a user to easily and accurately move a saw for proper alignment with a cutting material or workpiece. The saw slide device generally includes a sliding plate configured to support an associated saw, an adjustment or alignment mechanism configured to move the sliding plate, and a base frame (2585) which supports the sliding plate and adjustment mechanism.
