Abstract (en)
[origin: WO2021191146A1] The invention relates to a universal console (102) for a rail system (100) of an elevator system. The universal console (102) has a main support (112), which can be positioned and aligned, and at least one assembly point (116) for at least one rail (106) of the rail system (100), wherein the main support (112) has two guides (120), which are inseparably connected to the main support (112), for guiding a respective guideline (118), and the assembly point (116) and the guides (120) are arranged in a fixed position relative to one another.
