Abstract (en)
[origin: WO2021234169A1] The invention relates to a transport system for vertically transporting goods and persons on an above-ground construction site, comprising a slewing tower crane (40, 300) and at least one construction elevator (10), wherein the slewing tower crane and the at least one construction elevator have shared anchoring (12) and are anchored or can be anchored jointly to a structure (30) by means of said anchoring.
