Abstract (en)

[origin: WO2021191078A1] The present invention relates to the use of specific cinnamic acid esters as stabilisers of organic materials, in particular against oxidative, thermal and/or actinic degradation. The invention also relates to a corresponding stabilised organic material. The invention further relates to a method for stabilising organic materials, in which specific cinnamic acid esters are incorporated into the organic material. According to the invention, specific new cinnamic acid esters are also disclosed.
