Abstract (en)

[origin: WO2021194440A1] The invention relates to the content of a biodegradable and compostable, breathable film for use in many areas, particularly in the hygiene and medical sectors, and the production process of this film. The most important feature of the biodegradable and compostable, breathable film of the present invention is that it is breathable and contains a ternary polymer blend. Biodegradable and compostable, breathable film of the present invention is obtained as a result of a process involving compound extrusion (100), film extrusion (110) and stretching (120) Steps.
