Abstract (en)

[origin: WO2021201792A1] The invention relates to a composite material (1) comprising a base material (1.1) and a boron compound (1.2) added to said base material (1.1) at a predetermined ratio, said composite material comprises a boron compound (1.2) which is allowed to be at least 40% by adding the mixture obtained by suspending 50% by weight of boron compound (1.2) in polyether polyol to the base material (1.1).
