Abstract (en)

[origin: WO2021194433A1] The invention relates to a range hood comprising a glass panel (10) arranged on a body (1) reaching to an exhaust chimney (2) and confining an interior chamber (3), in an externally accessible manner; an opening (12) provided on the glass panel (10) so that reaching to the interior chamber (3); a plurality of movable push button (32) next to each other extending through the opening (12); and a control assembly (30) having a casing (34) holding the buttons (32) such providing support from behind and mounted to the glass panel (10) by the inner wall (16) thereof. The range hood is further comprising a cover (40) attached to the outer wall (14) of the glass panel (10) along a shielding portion (45) from the rear side (48) and equipped with plurality of holes surrounding each corresponding button (32) without blocking the push movement.
