Abstract (en)

[origin: WO2021189099A1] Embodiments relate generally to systems, methods, and processes that may use touch-free interactions at self-service interaction stations. In particular, embodiments relate to use of such stations in transit environments, such as airports or other transport hubs. Some embodiments relate to a self-service interaction station, having a video image recording device with a view of view in a display direction of display screen, a processor configured to determine a human face within captured images, to identify and track the movement of a tracking feature of a face identified within the captured images, and to cause the display screen to display a cursor over content displayed on the display screen during an interaction process and to move the cursor in response to movement of the tracking feature to interact with the content.
