Abstract (en)

[origin: WO2021224006A1] The invention relates to a high-voltage circuit breaker (1) comprising at least one vacuum interrupter (2) that is arranged in at least one housing (3), and to a method for insulating at least one vacuum interrupter (2) in at least one housing (3). At least one volume between the at least one vacuum interrupter (2) and the at least one housing (3) is filled with plastic foam (4).
