Abstract (en)  
[origin: WO2021199068A1] The present subject matter generally relates to an electric machine including a terminal holder (104). The terminal holder (104) is an integral member configured to be assembled on a housing of the electric machine (100) from an inner side of a housing of the electric machine. The terminal holder (104) is configured to hold three or more terminals (107) to enable connection of three or more lead wires of the electric machine with corresponding feed wires.
