Abstract (en)

[origin: WO2021197913A1] The invention relates to a method for mounting a camera (2) for a vehicle (1), comprising the following steps: - providing a first housing part (12) of an electronic housing (13) for the camera (2), in which a first groove (17) is formed on an outer side (16) of the first housing part (12), - providing a housing outer part (5) separate from the first housing part (12), which comprises a plug channel (6) and an inner side (8), wherein a second groove (9) is formed on the inner side (8), characterized by the following further steps: - introducing an adhesive part (14) into the first groove (17) and/or into the second groove (9), - assembling and retaining the first housing part (12) to the housing outer part (5) by an adhesive connection (18), wherein thereto the adhesive part (14) in the first groove (17) adheres to the first housing part (12) and the adhesive part (14) on the second groove (9) adheres to the housing outer part (5). The invention also relates to a pre-mounting module (19) and to a camera (2).
