Abstract (en)

The present invention provides: a cartridge for a heat-not-burn tobacco product including a tobacco filler, a container body for the tobacco filler, and a filtration medium, the container body being cylindrical and having the filtration medium positioned at at least one end thereof, the cartridge being such that an atomized aerosol is capable of passing therethrough from one end to the other end, and the tobacco filler containing 0.25-5.50 wt% inclusive of an acid having a boiling point of 120-250 °C inclusive, where the total weight of the tobacco filler is deemed to be 100 wt%; and a heat-not-burn tobacco product that includes the cartridge.
