Abstract (en)  
[origin: EP4131667A1] A connector comprising a conductive elastomer comprises: a first connector comprising a first substrate and a conductive elastomer; and a second connector that comprises a second substrate and a pad portion and is detachably coupled to the first connector, wherein the conductive elastomer is electrically connected to the first substrate, and is electrically connected to the pad portion when the first connector and the second connector are coupled, and the pad portion may comprise a plurality of signal pads. Various other embodiments are possible.
