Abstract (en)

[origin: WO2021204883A1] The invention relates to a pharmaceutical composition suitable for oral administration, containing as active ingredient a compound chosen from the group consisting of vorapaxar, vorapaxar isomers, atopaxar and 3,2-(chlorophenyl)-1-[4-(4-fluorobenzyl)piperazin-1-yl]propanone, and pharmaceutically acceptable salts thereof. This composition contains particles comprising a core containing a mixture of the active ingredient and of a substance capable of inhibiting recrystallisation of the active ingredient at a pH which has become greater than or equal to 5; and a pH-dependent, controlled-release coating layer covering said core, said coating layer being formed of a gastro-resistant coating agent and being porous.
