Abstract (en)

[origin: WO2021205236A1] The invention relates to a paint cup (1) for a paint spray gun (2), comprising a paint container (3) which has a container wall (4) and a base (5). The base (5) is made of a natural fibrous material, in particular a cellulose-based fibrous material, so as to be pierceable and has a piercing point or region in order to ventilate the paint cup (1). The invention additionally relates to a method for using a paint cup (1) with a base (5) which is made of a natural fibrous material and is pierced in order to form a ventilation valve.
