Abstract (en)

[origin: WO2021205489A1] The machine for packaging items inside relative cases (2) includes a conveyor line (10) for transporting the items to be packaged and a conveyor line (20) for transporting the cases (2) intended for packaging said items. The conveyor line (10) for transporting the items to be packaged and the conveyor line (20) for transporting the cases (2) are arranged side by side and operated with continuous motion. A transfer device (30) is capable of inserting said items in said relative cases (2). Said transfer device (30) is provided with a plurality of inserting members (40) capable of being operated in sequence on command of actuator means to make said insertion of said items in said relative cases (2).
