Abstract (en)

[origin: WO2022106676A1] The invention relates to beads and a composition comprising an aqueous phase comprising a plurality of beads, the beads comprising or consisting of a hydrogel matrix comprising at least one carboxyalkyl chitosan having glucosamine units, N-acetyl-glucosamine units and glucosamine units substituted with a carboxyalkyl group, the carboxyalkyl chitosan being crosslinked by means of covalent bonds between the carboxyalkyl chitosan chains and/or co-crosslinked by means of covalent bonds with one or a plurality of other polymers. The invention also relates to the methods for preparing said chitosan-based beads and the uses thereof.
